Review2 (điền số trang theo thực tế)

Acknowledge

As we understand that the eProject that we Received as a project on viruses, Dental or oral health is concerned with your teeth, gums and mouth. The goal is to prevent complications such as tooth decay (cavities) and gum disease and to maintain the overall health of your mouth.

1.1 A healthy mouth, free of infections, injuries and other problems with teeth and gums, is important in maintaining your overall health.

Although a different set of medical professionals focuses on dental health, they are still part of your regular health care team.

Disease and other conditions can affect your dental health and dental problems can affect other parts of your body. Failing to properly care for your oral health may lead to other health problems.

You can help prevent or minimize many oral health problems by regular preventive steps (brushing, flossing and so on) and regular visits to dental health professionals.

We would like to send a great thank to our professor and others student for the addorable supports during the time in project.

Beside serveral mistakes we had made in the project, we hope to have more oppotunities to widen our knowledge in web developing world.

We also thank you so much for your infomation and the “demo” project from India APTECH to help us get more reality experience in this project. Since we have gained more experience from this project, we will not stop learning any thing as much as we can to be more successful in the future.

Your Sincerely,

Team Group 07.

Synopsis

This project aims to develop a program that works on real life. These apps help us build a more powerful big app.

The goal not only teaches us about HTML/JavaScript but also gives us a real situation and helps us to create basic applications with tools.

Therefore, we can revise the chapters before starting the project.

This project is very important for students like us who have completed HTML5 modules. These programs should be implemented during Lab sessions with instructor support if necessary.

32smile-dot-com project aims to bring teeth and smiles to friends and family to make them happy with every smile that 32smile-dot-com brings

It is very necessary for us to have a clear understanding of the subject. we

thought we should take a look at the project and tackle the assignments as required

Okay.

And get back ***eprojects@aptech.ac.in*** as the assigned schedule.

Problem Definition

1. My eProject name is 32smile-dot-com.
2. Describe the content of the topic and state the problem

Problem definition:

Dental or oral health is concerned with your teeth, gums and mouth. The goal is to prevent complications such as tooth decay (cavities) and gum disease and to maintain the overall health of your mouth.

- A healthy mouth, free of infections, injuries and other problems with teeth and gums, is important in maintaining your overall health.

Although a different set of medical professionals focuses on dental health, they are still part of your regular health care team.

Disease and other conditions can affect your dental health and dental problems can affect other parts of your body. Failing to properly care for your oral health may lead to other health problems.

You can help prevent or minimize many oral health problems by regular preventive steps (brushing, flossing and so on) and regular visits to dental health professionals.

- Hence to increase the awareness and provide all information about dental care , we are looking for developing a website “32smiles.com” based on the requirements mentioned below
- Identify the problem
 1. Provide information about 32smile to users and members
 2. Provide information on treatment and prevention of the your teeth, gums and mouth

3. Get feedback from users and members to increase quality and have more complete information about dentis
4. Give administrators the ability to update dentis information quickly and accurately
5. Give administrators the ability to manage members
6. Provide content for members and members to download and read on their personal devices

Guest:

1. You can visit the website to see information about the member dentis, its treatment and prevention.
 2. Can register as a member
 3. Can feedback to administrators
2. Describe the functions for each object such as user/member, webmaster...

Customer Requirements Specifications

Describe the points in the data processing cycle for each user object

User:
